Correction to: Cost-effectiveness evaluation of the 10-valent pneumococcal non-typeable *Haemophilus influenzae* protein D conjugate vaccine for children in Taiwan

Chun-Yi Lu¹, Ching-Hu Chung², Li-Min Huang¹, Eliza Kruger³, Seng-Chuen Tan³, Xu-Hao Zhang⁴ and Nan-Chang Chiu^{2,5*} 

Correction to: *Cost Eff Resour Alloc* (2020) 18:30

<https://doi.org/10.1186/s12962-020-00225-9>

After publication of the original article [1], the authors flagged that following an update to the Markov model during the development of the manuscript (an update which resulted in modification of the estimated savings in the Results) some out-of-date values had been erroneously retained throughout figure(s) in the article. In addition to this, the related text regarding Additional file 2 had been omitted from the end of the Conclusion section.

These errors have been corrected in the original article. Please find below a summary of the errors that have been corrected:

In the Results of the Abstract:

“6.7 million” had been written instead of “8.8 million”
“90.5%” had been written instead of “61%”

In Table 2, in the row ‘AOM Myringotomy’:

“50.92%” had been written instead of “38.82%”

In the subsection ‘All-cause pneumonia effectiveness’:

“23.8%” had been given for the effectiveness estimate of PCV13 against all-cause pneumonia, while the value should read ‘23.7%’.

In Table 6, in the row ‘Death due to IPD/pneumonia’, under columns ‘PCV13 (A)’ and ‘PHiD-CV (B)’, respectively:

“17” and “17”, respectively, had been detailed instead of “19” and “19”, respectively

In Table 6, in the row ‘All-cause pneumonia’, under the column ‘Difference (B–A)’:

“NTD 557 957” had been written instead of “NTD 557 887”

In Table 8, column ‘Cost (millions)’ (in descending order):

– 0.6 had been written instead of – 5.9
– 6.6 had been written instead of – 8.8
– 3.9 had been written instead of – 4.8
– 0.8 had been written instead of – 1.2
– 7.1 had been written instead of – 9.3
– 14.4 had been written instead of – 19.6
0.15 had been written instead of 5.5
– 6.7 had been written instead of – 8.8
– 88.2 had been written instead of – 90.4

The original article can be found online at <https://doi.org/10.1186/s12962-020-00225-9>.

In Table 8, column ‘QALY’ (in descending order):

8 had been written instead of 14

6 had been written instead of 5

21 had been written instead of 22

38 had been written instead of 39

38 had been written instead of – 12

In the Footnote of Table 8:

“– 6.7 million” had been written instead of “– 8.8 million”

At the end of the ‘Conclusion’, the following sentence was missing:

“The supplementary Fig. 2 stresses the general context and observations that were made in the present study.”

The authors apologize for any inconvenience caused.

Ready to submit your research? Choose BMC and benefit from:

- fast, convenient online submission
- thorough peer review by experienced researchers in your field
- rapid publication on acceptance
- support for research data, including large and complex data types
- gold Open Access which fosters wider collaboration and increased citations
- maximum visibility for your research: over 100M website views per year

At BMC, research is always in progress.
